

# Are YOU at High Risk for BREAST CANCER?

Women who face a higher-than-average risk for breast cancer may need enhanced breast cancer screening and surveillance in order to detect breast cancer at its earliest and most treatable stages. If you face a high risk for breast cancer, we can help.

With Roswell Park's High Risk Breast Cancer Program, our breast cancer experts provide a comprehensive evaluation and assessment of your personal risk for breast cancer, advanced screening and diagnostic tools, and a surveillance plan to monitor your health and reduce your risk.

Talk to us about a personal breast cancer risk assessment if you answer yes to any of the following questions:

YES

NO

1. Does cancer run in your family?

2. Do you have a family history of ovarian cancer?

3. Did your mother, father, sister or brother have breast cancer?

4. Did at least two aunts, uncles, grandparents or first cousins have breast cancer?

5. Do you or does anyone in your family have a mutation in any of these genes: BRCA1, BRCA2, PTEN, TP53, PALB2, ATM or CHEK-2?

6. Have you had radiation treatment to your chest as a child, adolescent or young adult?

7. Have you ever had an abnormal breast biopsy?

8. Do you have neurofibromatosis (NF-1)?
