

## Discharge Instructions: Drain Care – Dr. Crooks

Please read and follow these instructions.

### General Instructions

- Empty the drain when it is  $\frac{3}{4}$  full and record daily (24 hour) output
- After emptied, squeeze the air out of the bulb and close the drain

### Call us IMMEDIATELY if ...

- you have excessive bleeding, pain, or redness around the area of the drain
- you have foul smelling drainage from the drain or the skin around it
- your drains are completely filling up every hour
- you have a fever of **100.4 °F (38°C) or higher**

### Who to Call

- Breast Care on Park Club Lane: **716-332-6834**
- Southtowns on Orchard Park Rd: **716-656-4450**

If you call either number after hours, you will be referred to the on call provider.
