<input type="radio"/>	I am interested in pursuing a combined medical and scientific profession specializing in oncology/cancer research.

F. Personal Statement

Based on the education and career goals you indicated in the previous questions, write a personal statement in paragraph form which answers the following three questions:

- (1) What is your motivation towards the educational and career goals you have chosen?
- (2) How will an internship in a cancer research laboratory help you to determine or achieve your educational and career goals?
- (3) What knowledge, skills and insight do you hope to attain from a cancer research experience?

\*35. Please write or cut and paste your 250 word personal statement in the space provided below. (\*Required)
