**ROSWELL PARK
RECOMMENDS
WOMEN AGE 40
AND OLDER HAVE
AN ANNUAL
MAMMOGRAM.**

Marie Quinn, MD
Director of Breast Imaging
Roswell Park Comprehensive Cancer Center

An annual mammogram is the best way to detect breast cancer at the earliest and most curable stages. Here's why you should schedule your appointment at the Roswell Park Breast Imaging Center:

1. EXPERTISE.

Cancer detection, diagnosis and treatment are our specialty. Our staff is uniquely qualified and proficient in mammography, ultrasound, breast MRI and minimally invasive breast biopsy. Our digital tomosynthesis machines (3D mammography) increase our ability to find cancers and decrease your chance of having to come back for additional imaging.

2. CONVENIENCE.

Express appointments take 30 minutes or less! With this option, you can leave your appointment immediately following your mammogram and receive a personal phone call with the results the following day. However, you also have the choice to stay and have your results read during your appointment by an expert radiologist. Free, on-site parking near our beautiful, tranquil Breast Imaging Center will make your visit with us hassle-free. Our staff will take care of getting films of your previous mammograms for comparison.

3. Comprehensive Care.

Most screening mammograms are normal. However, if your mammogram reveals an area that requires biopsy, our experts provide image-guided, minimally invasive biopsy procedures. If cancer is found, you'll be in the right place with trusted providers of our multidisciplinary breast cancer care team.

Do it for YOU! Do it for YOUR FAMILY!

Mammography saves lives. Take care of yourself so you can be there for those you love.

SERVICES WE OFFER

- Mammography, screening and diagnostic
- Advanced breast imaging, such as Ultrasound, MRI, 3D mammography
