

# Plastic & Reconstructive Surgery

Head-to-toe solutions to restore appearance and function in any body part

Roswell Park's Plastic & Reconstructive surgeons provide a full menu of services to **solve a broad range of complex problems** related to cancer, trauma, pressure ulcers, or delayed effects of chemotherapy, surgery, or radiation treatment.

## What Sets Us Apart

- **Highly trained, board-certified** surgical team uniquely qualified to perform advanced microsurgery techniques for any reconstruction need related to cancer or the effects of treatment.
- **Latest autologous flap procedures** with success rate above 98%
- **One-Day Jaw Reconstruction** in which tumor resection, jaw reconstruction and dental implants are accomplished in one day.
- **Same-day post Mohs** surgery reconstruction.
- **Reconstruction is planned and coordinated with the oncology care team** for optimal cancer control, healing, and timing and sequence of procedures.
- **On-site Dental & Maxillofacial Prosthetics** to coordinate with reconstruction procedures.

## WE OFFER THE FOLLOWING SERVICES:

- ✓ **Breast reconstruction options for immediate or delayed treatment include:**
  - **flap techniques** including Deep Inferior Epigastric Perforator (DIEP) flap and modifications, Lattismus, SGAP/IGAP, and TUG
  - **fat grafting and injections** to achieve more natural result
  - **single-stage, direct to implant reconstruction**
  - **two-stage, expander to implant reconstruction**
  - **prepectoral implant placement** to prevent animation deformity
  - **symmetry procedures**
  - **pre-mastectomy breast reduction** to preserve nipple-areola
- ✓ **Lymph node transplantation**, a revolutionary procedure that can reduce or eliminate symptoms of lymphedema.
- ✓ **Treatment for melanoma, basal cell and squamous cell cancer** with possible scar minimization
- ✓ **Limb preservation or reconstruction** following trauma or cancer surgery
- ✓ **Peripheral nerve reconstruction**, to correct such disorders as neuropathy resulting from nerve resection
- ✓ **Facial reanimation**, to restore movement and improve appearance following paralysis related to injury, surgery or illness
- ✓ **Amelioration of complications related to orthopedic surgery**, such as necrosis-related hardware exposure
- ✓ **Pelvic reconstruction** after treatment for colorectal, vaginal or cervical cancer
- ✓ **Chest wall reconstruction**
