ROSWELL PARK: It Starts with *One*

FOUNDATION FOR THE FUTURE

Building on a 125-year history of the country's first cancer center, Roswell Park is positioned as a destination center for the future of cancer innovations. We're looking for talented people who want to join our mission to eliminate cancer's grip on humanity.

Dr. Roswell Park

Founded in 1898, Roswell Park Comprehensive Cancer Center was the first institution in the world to focus exclusively on cancer research. Eminent surgeon, Dr. Roswell Park, sought to create a powerful force against cancer by bringing together the knowledge and skills of pathologists, chemists, biologists, surgeons and other experts – all in one center.

That vision has fueled more than a century's worth of medical discoveries and breakthroughs. Among the first to be designated a comprehensive cancer center by the National Cancer Institute, we pioneered the standard for today's multidisciplinary approach to cancer care, scientific research and the development of new therapies and technologies.

Today, we set ourselves apart as a leader in transplant and cellular therapies, personalized medicine, cancer vaccines, immunotherapy and robotic surgery.
