

Survey Regarding NHSN Reporting Practices of PPS-Exempt Cancer Centers -

	The James	H. Lee Moffitt	MSKCC	Karmanos	Roswell Park	City of Hope	Fox Chase
<b>CLABSI Reporting</b>							
1: How many of the PPS-exempt cancer hospitals (ADCC members) are reporting to NHSN as an oncology hospital effective 1/1/2013?	reported CLABSI's for BMT and Hem/Onc to NHSN in the past under OSUWMC number. In 2013 we have our own NHSN number and will report as an oncology hospital and will report CLABSIs for all units	yes	yes	Not exempt, but do report as an oncology hospital	Yes- we are only oncology	City of Hope has been reporting	Fox Chase has since 2008
2: If you are reporting to NHSN as an oncology hospital, are you collecting central line rates separately for both temporary and permanent central lines for all inpatient units?	yes, would like to stop that as it is hard to get that info electronically and I report on our scorecard as total numbers	yes	yes	Collecting both temp and perm central line days for all inpatient units.	Yes- all inpatient units	YES we are all oncology	Yes started in 2011
3: In the data that you submit to C4QI are you including ALL inpatients? If not, are you submitting oncology units only, critical care units only, or another subset of patients (please describe)?	Yes, all inpatients, we are an oncology hospital	yes, all are reported	yes	Not reporting to C4QI at this point.	Yes- all inpatient units	yes	all units
4: For the CLABSI numerator data (# of CLABSIs) that you report to NHSN are you including or excluding those infections that meet the mucosal barrier injury – laboratory confirmed bloodstream infection (MBI-LCBI) definition?	They have to be reported and will be counted as CLABSIs however you just designate they are CLAMBIs as well	Including all in the # reported to NHSN but classifying the MBI_LCBI as such	We are including the patients that meet the MBI definition. When we enter them in NHSN there is a section to mark the MBI criteria that the patient meets so NHSN is aware of which cases meet this new definition.	Haven't reported any MBI-LCBI to date as most fit criteria for secondary BSI.	Reporting all CLABSIs and MBI-LCBIs	YES as the CLABSI definition requires this	including (we were so disappointed hoping it would have been a separate criteria)
<b>CAUTI Reporting</b>							
1: How many are reporting CAUTI rates to NHSN for ALL inpatients? If not all, are you submitting critical care only or another subset of patients (please describe)?	We will be submitting for all the units	all inpatients	We report for all inpatients	Reporting critical care only	Yes- all inpatients	HOUse wide	reporting all units
