Do You Do Routine Screening Cultures For VRE?	No	No	Yes			No	Yes	No		No		Yes/partial			Yes/possiblechange in policy pending		Yes	Partial			No	No			
Comment	Used to do passive surveillance (stools sent for C diff were also screened for VRE), but Micro stopped that as a cost measure sometime around first of July. We are following VRE BSI to see if there is an increase, so far, we haven't seen one.	Screens for VRE in the pretransplant period. do not rescreen.	Hem/Onc and BMT population on admit and weekly. This screening is also carried out in the ICUs at Brigham and Women's hosp [we consider these areas as high risk]				Screen heme/onc and BMT patients on admission and weekly. Also screen on admission only transfers from other facilities and those that have been an inpatient in another facility within the last 30 days.					VRE on admission and discharge to ICU and our BMT unit			We screen on BMT/Heme Onc on admission and every Monday. We are discussing policy change		Leukemia, SCT and MICU and PICU on admission and weekly	Liver Transplant Unit Only
