Mandatory flu immunization Y or N or pending	Yes	N	pending	under discussion			for high risk (BMT) have	Non-discretional, All employees must eilher receive the vaccine or file a reason for exemption with the signature from physician(medical reason), spiritual advisior(religious/spiritual reason) or self signature with reason. Everyone that does not recieve the vaccine takes a mandatory CBL on influenza			No. However, mandatory participation required for high risk patient caregivers in 09-10 season. 10-11 season will require mandatory participation = get flu shot or sign declination form with reason - including allergy)	pending			No- much to our dismay, senior leadership not willing to make immunization or declination mandatory (praying NYS makes it mandatory again)	We do allow staff to decline the vaccine. Any staff that decline must sign ad declination form, we also talk to them to them to them to them with education on the importance of getting vaccination was not approved this year, making it hard to do more than the declination at this point.		NO			
Mask if not immunized Y or N	Y	N	pending	under discussion			No	Yes if documented exposure occurs and may be required as flu escalates in the community				no			No	No		NO			
Mask door to door or 3-6 feet of patient	door to door	DOOR	door to door	was 3-6 feet, changed to door to door for H1N1, discussing if we should keep it door to door.			No	Mask at the door to patients' room				door to door				n/a		YES			
Comments		We requires masks and gloves for all HEM patients 365 days a year. Last year we required maks and glove for all patients for the flu season
